EXECUTIVE SUMMARY

Highly autonomous, results-driven technology leader with over 10 years of experience building and running multi-functional organizations across DevOps, cloud-native infrastructure, IT operations, and enterprise security. Recognized as an elite CNCF Golden KubeStronaut, bringing deep domain authority in scaling high-availability AWS environments, automating developer self-service pipelines, and enforcing strict security compliance (including SOC 2 and zero-trust patterns). Masterful at uniting corporate IT systems, SaaS administration, and operational governance to drive maximum platform resilience, cost-efficiency, and developer productivity.

TECHNICAL SKILLS

- **DevOps & Infrastructure:** AWS (EKS, RDS, VPC, IAM), Kubernetes, Docker, Linux, Infrastructure as Code (IaC / Terraform), GitOps, CI/CD.
- **Security & Compliance:** SOC 2 Type II, Vulnerability Management, Zero-Trust Access, Risk Mitigation, Secure Software Delivery, Identity & Access Management (IAM).
- **IT Operations:** SaaS Administration, Enterprise IT Operations, Identity Providers, Asset & Device Management, Incident Management (incident.io), SLAs.
- **Observability & Data Platforms:** Metrics/KPIs, SLIs, SLOs, Error Budgets, Prometheus, Grafana, Datadog, Redpanda, Debezium, Snowflake, Omni BI.

PROFESSIONAL EXPERIENCE

PATRIOT SOFTWARE, LLC

Assistant Director of Platform / Group Lead DevOps / Lead DevOps Engineer | Jan 2022 – Present

- **Multi-Functional Leadership:** Grow, mentor, and lead a high-performing, cross-functional engineering organization of 15+ engineers across DevOps, SRE, Database Engineering, Analytics, IT Operations, and Security, supporting 100+ developers.
- **AWS Infrastructure Scaling:** Guide technical roadmaps and manage architectural strategy for highly available, resilient, and scalable AWS infrastructure supporting 5 production-grade clusters across 3 environments.
- **Corporate IT & SaaS Operations:** Direct corporate IT operations, standardizing tooling and automating workflows to secure end-user SaaS administration, device management, and secure identity mapping.

- **Security & Compliance Ownership:** Lead platform readiness, technical auditing, risk management, and governance frameworks to successfully achieve and maintain SOC 2 Type II compliance.
- **Zero-Trust Identity Access:** Engineered automated Just-In-Time (JIT) production database and VPN access workflows, enforcing zero-trust security and secure IAM privilege escalation while accelerating troubleshooting velocity.
- **CI/CD & Developer Productivity:** Transformed deployment practices to enable rapid, on-demand software delivery, reducing pipeline workflow times by 77% (from 40 minutes to under 10 minutes).
- **FinOps & Cost Optimization:** Partner with executive leadership to implement cloud cost-governance structures, achieving a 35% reduction in cloud infrastructure spend through right-sizing and Spot Instance integrations.
- **Observability & Incident Management:** Standardized enterprise observability and migrated incident management to incident.io, slashing MTTR by 80% while establishing rigorous blameless post-mortem practices.
- **Modern Data Infrastructure:** Architected a high-throughput streaming pipeline utilizing Redpanda, Debezium, Snowflake, and Omni BI, vastly reducing reporting load times and unblocking advanced analytical capabilities.
- **AI Infrastructure Innovation:** Architected next-generation infrastructure to support a homegrown AI agent orchestrator and decentralized Model Context Protocol (MCP) servers, driving continuous innovation and exploring AI-driven operations.

INNOVAPOST

Senior DevOps Engineer / Team Lead | Apr 2015 – Sep 2021

- **Team & Infrastructure Management:** Led and mentored a DevOps team of approximately 10 engineers, driving infrastructure resilience, containerization maturity, and cloud automation.
- **Enterprise Platform Operations:** Led platform operations supporting hundreds of enterprise applications across multiple environments, overseeing WebLogic infrastructure and proprietary container orchestration platforms.
- **Release & CI/CD Pipelines:** Orchestrated biweekly enterprise production deployments, maintaining a 99.9% release success rate across large-scale application suites by coordinating cross-functional stakeholders.
- **Operational Incident Governance:** Directed high-severity incident management responses across large-scale production tiers, establishing clear root-cause analysis (RCA) workflows and implementing process optimizations that significantly reduced MTTR.
- **Infrastructure Modernization:** Standardized enterprise CI/CD pipelines and infrastructure automation patterns; drove platform evolution initiatives that contributed to the organization's early adoption of containerization and Kubernetes-based operational models.

NOVA NETWORKS

Information Technology Operations Team Lead | Jan 2014 – Apr 2015

- **IT Operations & Service Delivery:** Led daily IT infrastructure operations and end-user environment management, ensuring consistent, secure, and scalable IT service delivery for enterprise clients supporting WebLogic and WebSphere clusters.
- **SLA Enforcement:** Managed high-availability IBM MQ messaging infrastructure and Linux server environments to consistently hit and exceed strict operational client SLAs.
- **Support Triage:** Directed incident management triage, established root-cause analysis workflows, and engineered custom automation scripts to dramatically decrease manual IT ticketing overhead.

KINAXIS

Lead Integration Specialist | Feb 2012 – Jan 2014

- **Enterprise Integration:** Designed and deployed highly integrated data pipelines using Mule ESB, MySQL, and Apache MQ to onboard corporate clients onto the platform securely.
- **Operational Integrity:** Maintained data ingestion integrity, supported business-critical production environments, and managed incident response.

CANADIAN NATIONAL RAILWAY

WebSphere Message Broker Developer | Mar 2010 – Jan 2012

- **Integration Development:** Developed high-throughput integration solutions using WebSphere Message Broker and IBM MQ to support mission-critical enterprise transportation and logistics systems.
- **Asynchronous Architecture:** Designed robust enterprise messaging patterns to guarantee reliable asynchronous communication across disparate systems and provided swift resolution for middleware infrastructure issues.

VERIZON BUSINESS

Message Broker Developer | Aug 2006 – Dec 2009

- **Integration Development:** Developed and maintained enterprise integration applications using WebSphere Message Broker and IBM MQ within large-scale telecommunications environments.
- **Legacy Network Strategy:** Implemented complex, messaging-based solutions to enable resilient and secure enterprise data exchanges across distributed legacy networks, collaborating closely with cross-functional network and software engineering teams.

EDUCATION

- **Master of Science in Electrical Engineering**
Villanova University, 2005

CERTIFICATIONS & RECOGNITIONS

- **CNCF Golden Kubestronaut Ecosystem Recognition** – Cloud Native Computing Foundation
 - Achieved the highest tier of distinction within the Cloud Native Computing Foundation and Linux Foundation ecosystem by mastering all active performance certifications (including CKA, CKAD, CKS, KCSP).
 - Recognized among the earliest global recipients, including the 2nd woman in the United States and the 6th globally.
 - Active contributor to the cloud-native community with consistent engagement across CNCF, KubeCon, and Kubernetes Community Days (KCD) ecosystems.
